The Honorable Tom Cole
Ranking Member, Appropriations Subcommittee
on Labor, HHS, Education & Related Agencies
U.S. House of Representatives
Washington, DC 20515

Dear Chairs Blunt, DeLauro and Ranking Members Murray and Cole:

We are writing on behalf of the Learning and Education Academic Research Network (LEARN) Coalition to express our support for increased funding for several key education research programs that your subcommittee will debate as part of the ongoing Fiscal Year (FY) 2020 appropriations process. LEARN, a coalition of nearly 40 leading research colleges of education across the country, supports critical investments in research aimed at advancing the scientific understanding of learning and development. We advocate for greater funding for these priorities across all Federal agencies, including the Institute of Education Sciences (IES), the National Institute of Child Health and Human Development (NICHD), and the National Institute of Mental Health (NIMH).

We recognize that non-defense discretionary (NDD) funding for FY 2020 would absorb a \$55 billion cut under the Budget Control Act. While strongly advocating for increased education funding for IES, NICHD and NIMH, we urge Congress to first reach a new budget agreement to avert these cuts and increase NDD funding levels over FY 2019. This budget deal and its increase is vital for these agencies to maintain and build the investment made in education research and data to enhance instruction and student learning. Examples of critical education research funded by these agencies include the development and adoption of a statewide approach to math instruction in Florida and now other states; the development and implementation of a reading curriculum now being adopted as a stateside literacy approach by a State legislature and improved instructional and behavioral practices for children with disabilities.

As the primary Federal Agency charged with supporting research for education practice and policy, IES is essential to developing a comprehensive, reliable evidence base, and ensuring that teaching and learning practices are grounded in scientifically valid research. Increased funding for education research is vital to the implementation of major Federal education programs funded under the Elementary and Secondary Education Act, the Individuals with Disabilities Education Act and the Higher Education Act, as all of these statutes require a focus on the use of evidence-based approaches.

www.learncoalition.org ♦ info@learncoalition.org

Given the importance of developing reliable evidence, LEARN is requesting \$670 million for IES overall and \$210 million for the Research, Development, and Dissemination line item within IES, in order to keep up with growth and inflation. In addition, we believe that funding for research in special education, through the National Center for Special Education Research (NCSEER), should be increased by \$5 million, to \$61 million, still well below its FY2010 level of \$71.1 million, to which it has never been restored following the FY2011 appropriations process. These increases are critically needed as only one out of every 10 applications are funded by IES, due to budget constraints, presenting lost opportunities to further strengthen evidence-based practice across the education spectrum.

There are critical education research programs in other agencies that also need additional support. NICHD is essential to education research as it examines brain functions and the impact of different educational services on learning and development. LEARN supports a similar percentage increase in NICHD funding – in line with growth and inflation – to bring the total to \$1.606 billion. This increase will ensure that researchers can build on the knowledge already gained, evaluate what works best in treating developmental disorders, and develop new research-based strategies to improve student’s learning and development.

In addition, LEARN supports a similar percentage increase in funding for NIMH over FY2019 enacted levels, bringing the total funding to \$1.994 billion. This increase will help further understanding of the behavioral, biological, and environmental mechanisms necessary for developing interventions to reduce the burden of mental and behavioral disorders and optimizing learning and development.

The LEARN Coalition believes strongly that these key investments in education research will drive improvements in teacher and student performance in the coming years. Thank you for considering these requests and please contact us if we can be of any assistance.

Sincerely,

Glenn E. Good, Ph.D.
Co-Chair, Learning and Education Academic Research Network (LEARN)
Dean of the College of Education, University of Florida

Camilla P. Benbow, Ed.D.
Co-Chair, Learning and Education Academic Research Network (LEARN)
